Solutions

Choose Grapevine

When you select a vendor to convert or typeset your content or to reengineer your **content workflows, you don't want to sacrifice quality for low pricing. You also don't** want any surprises later in the project lifecycle like unexpected correction charges or schedules that run long. When problems arise, how much do you really save?

With Grapevine, you don't have to compromise your content conversion, composition, and consulting projects. You will receive final deliverables that meet and exceed your budget, quality, and schedule requirements every time—with no surprises.

As a small business with many partnerships and proprietary operational and pricing systems, our pricing competes with, and beats, that of larger business process outsourcing companies and international competition. Your project will receive unmatched, U. S.-based, quality control at every stage. A flexible, scalable business model gives project managers flexibility to meet your requested schedules.

Our dedicated, experienced staff and partner professionals are ready to serve any or all your content solutions needs. Contact us today to discuss or quote your next project.

Content Services

COMPOSITION: When you entrust your book or journal typesetting to Grapevine, you can expect to receive the best of both worlds: typographically exquisite pages reminiscent of the high-quality typesetting of yesteryear but composed in an efficient batch-processing environment with a high-end XML composition engine.

DATA CONVERSION: For your data conversion outsourcing, we offer front- and back-end encoding from many formats. Whether your data conversion plans involve a public DTD or a custom schema, you will benefit from our years of commitment to standardized markup languages.

DATA PREPARATION: All data preparation projects are subjected to thorough analysis and rigorous quality control processes. Your data receives the proper structure and contains the appropriate metadata that will permit its reuse in formats both known and yet to be invented.

DATA ENTRY AND CAPTURE: Do you require OCR scanning or double keying from manuscript to reach your end goal of converting data from print to an electronic format? Our scalable staff will work with you to ensure timely delivery of the most demanding data entry and capture projects at competitive prices.

KINDLE AND EPUB CONVERSIONS: The e-book market is experiencing tremendous growth.

Don't miss out on another revenue stream generated from your new and existing content. Grapevine offers both Kindle and EPUB conversions, so your content is accessible regardless of reading device.

Customized Solutions

CONSULTING AND WORKFLOW PLANNING: Whether it is optimizing your existing XML workflow or reengineering your processes entirely, Grapevine will identify your problem areas quickly and suggest effective, efficient solutions to your workflow management issues.

XML APPLICATION DESIGN/DEVELOPMENT: Do you need assistance with the creation, maintenance, or adaptation of a DTD or schema or the development of XSLT applications or XML-based content management systems? Let Grapevine help you navigate an alphabet soup of options to find **the solution that's right for you.**

PRODUCTION MANAGEMENT AND PACKAGING SERVICES: Typesetting services are just one part of the production process. Grapevine can take your raw source content from copyediting or design through indexing and export to print or digital deliverables.
